## Wire Joining, Tensioning & Terminating

up to  
**70% FASTER**  
than traditional  
tying methods

## Max Engineering • Max Usability • Max Reliability

Industry tested and proven against the best the world has to offer. Beneath the zinc alloy housing is a stainless steel spring and hard alloy cam wedge mechanism delivering maximum corrosion resistance and durability.

The MaxTensor range features the medium and large joiners, terminator and tensioning tools. Exclusively distributed throughout Australia by Whites Rural.

### Joiner & Tensioner

**Medium** for joining & tensioning fencing wire and fabricated fence.

**Large** for joining & tensioning fencing wire and horticultural wire.

Medium	Suits 1.8mm to 3.2mm
code: 12157	20pk
code: 12156	100pk
code: 12155	250pk
Large	Suits 3.3mm to 4.2mm
code: 12159	10pk
code: 12158	150pk

### Terminator & Tensioner

Unique design for through-post and around-post tying-off applications. Saves valuable time. Allows for easy re-tensioning over time.

Medium	Suits 1.8mm to 3.2mm
code: 12152	20pk
code: 12151	300pk

### Tensioning Tools

MaxTensor range of tensioning tools are designed to make it easy to tension and strain fences with professional results.

Heavy Duty Steel – Contractor Grade	
code: 12161	Intensive use
Polymer & Steel Core	
code: 12160	Moderate use
